Mankind's four big challenges for the future and for sustainability

Use all natural resources intelligently and effectively, so as to respond positively to population growth and the evolution of human needs.

Safeguard climate stability by controlling greenhouse gas emissions, which must be reduced by 2020.

Promote more efficient use of increasingly scarce water resources, so as to preserve an asset that may be in short supply in the near future.

Increase development of energetically efficient infrastructure with a low environmental impact, so as to respond to growing urban populations and ensure respectful and sustainable urban development.

**300 years of history
15 systems**

Our experience is your guarantee

The Fassa Bortolo tradition stretches back to 1710. Passed down from generation to generation, it has constantly evolved, standing out for innovations which have made an essential contribution to the sector.

In Italy, it was the first company to introduce premixed lime and cement plasters for all types of building work.

It was the first to develop silo technology, the product supply system which revolutionised work on site.

Today it is a sector leader, a reference point for all those working in the building industry: designers, dealers and the builders themselves.

Quality building and living in respect of man and the environment

One philosophy runs through all Fassa Bortolo products. A mission to bring innovations into our working and living environments. Developing building products and materials with ever better performance and improving the psycho-physical well-being of the individual ever more effectively. Ever better able to safeguard this well-being in harmony with that of the environment. Safety, efficiency, durability. Here at Fassa Bortolo, our values have always included comfort, balance and respect.

Because we are committed to evolution of the building sector and the quality of life.

We combine our resources to achieve a single objective: greater well-being and better quality of life.

Ever greater resources to be ever closer to the needs

Its presence on the ground is another of Fassa Bortolo's great strong points: 12 production sites and three sales offices in Italy, one sales office in Portugal, two in Switzerland, one in France and one in Spain. A well-developed network has always been a priority for the company to be ever nearer the customer and guarantee a swift response.

integrated| system

15 systems coherently integrated systems

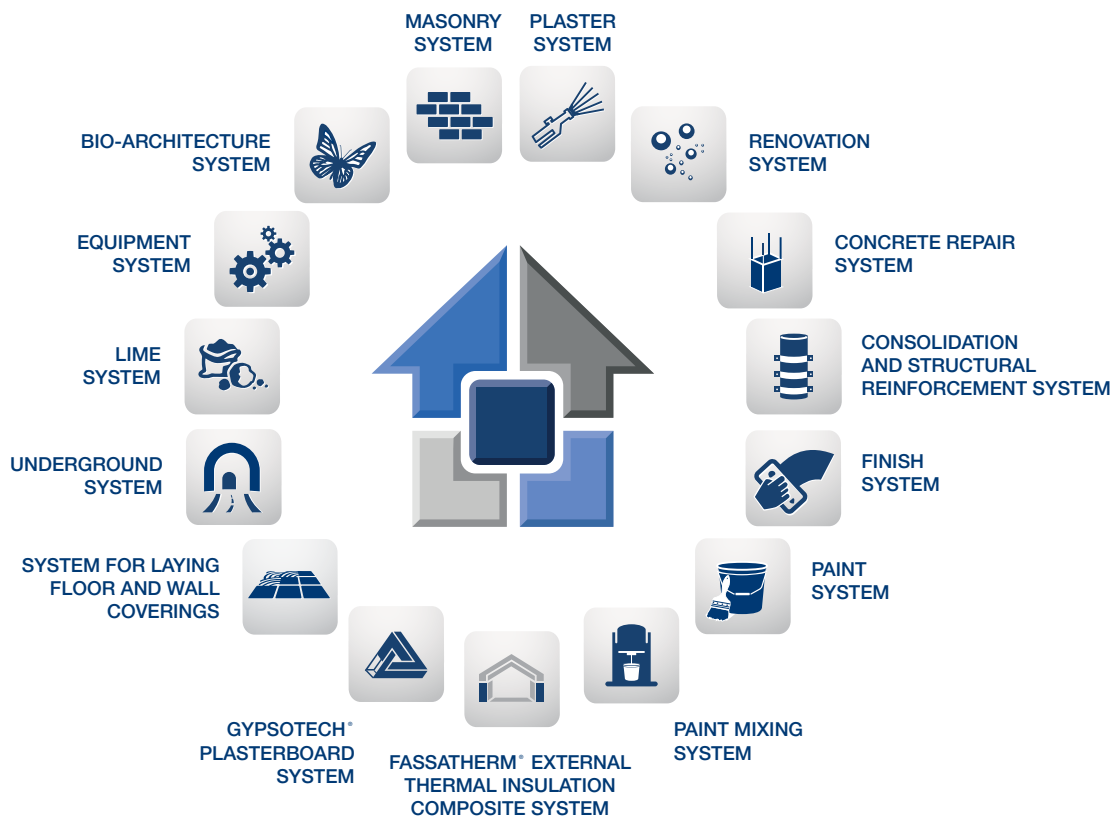

A synergic set of products, skills, research and services
for all types of work.

Intelligent Synergy

From traditional materials to plasterboard.

**From bio-architecture to the External Thermal
Insulation Composite System.**

Combining resources towards a single objective means
creating an integrated system. The Fassa Bortolo Inte-
grated System. The first and only in the sector, it offers
the advantage of a range of products and skills acting
in synergy, guarantees the absolute quality of all types
of work and extends and integrates a project's potential
and opportunities.

Certified quality for the building sector

For us, research is a fundamental asset

The attention Fassa dedicates every day to research has also been recognised by ISO 9001:2008 certification. Further confirmation of the top quality we offer the building sector.

Construction Products Regulation CPR 305/2011 – CE marking and DoP

All Fassa products comply with EC standards and regulations, satisfy all the performance requisites for building products (CPR 305/2011) and bear CE and DoP marking. The DoPs (Declarations of Performance) for Fassa Bortolo and GypsoTech products can be downloaded from our websites: www.fassabortolo.com and www.gypsotech.it. All technical documentation bears special logos highlighting possession of these requisites, while others confirm compliance to the criteria and classification methods specified in European standards and regulations.

ClimateHouse

Being a ClimateHouse partner means having recognised technical skills and a constant commitment, through our products, to energy efficiency in new and renovated buildings, in respect of the environment.

European Technical Approval (ETA) and safety in all components

The quality and safety of every component in the system is decisive in guaranteeing optimum efficiency and durability. From insulation to adhesive/skim coat, anchors and reinforcing bars, all elements in the Fassatherm® External Thermal Insulation Composite System are submitted to the strictest controls possible. The Fassatherm® External Thermal Insulation Composite System has European Technical Approval ETA 07/0280 and ETA 09/0282, attesting the technical suitability of the system for thermal insulation applications, based on compliance with all the requirements of the ETAG 004 guidelines. The European Technical Approvals for the FASSA BORTOLO External Thermal Insulation Composite System are available in full from the www.fassabortolo.com website.

British Board of Agrément (BBA)

The British Board of Agrément (BBA) has issued certification for FASSATHERM External Wall Insulation system (EWI). BBA certification was deemed necessary to extend the system offer covered under the existing ETA specifically for the UK market. The system certification now includes standard grade (white), high performance low lambda (grey) expanded polystyrene and mineral wool.

ANAB (Associazione Nazionale Architettura Bioecologica) and ICEA (Istituto per la Certificazione Etica e Ambientale) quality certification

An important recognition for bio-ecological products, certifying maximum attention to the environment and full compliance with the strictest bio-architectural criteria. Fassa Bortolo's Bio-Architecture line was the first line in Europe to obtain certification with KB 13, the first plaster certified in 1999, setting the standards in the sustainable architecture sector.

GEV EMICODE

Voluntary mark certifying the emission of volatile and semi-volatile organic compounds (VOC and SVOC) issued by GEV (the Association for the Control of Emissions in Products for Floor Installation, Adhesives and Building Materials), applied to the products in the System for Laying Floor and Wall Coverings. Following severe tests, the very low emissions of Fassa products earned them EC1 Plus certification.

LEED certification Leadership in Energy and Environmental Design

This certification confirms that buildings are environmentally sustainable, both as regards energy usage and consumption of environmental resources during construction. The particular feature of this standard is that it covers all sectors involved in building design, from choice of construction site, site management, careful use of drinking water, the energy efficiency of the building shell and technical installations, use of renewable energy sources, use of partially recycled materials and quality and comfort inside the building.

Indoor Air Quality

All products in the Fassa Bortolo Colour System respect the parameters established by European Union regulations and standards aimed at limiting the emission of organic compounds. They therefore comply with the provisions of Italian Legislative Decree no. 161 of 27/03/2006 (implementing Directive 2004/42/EC), identifying the maximum content of Volatile Organic Compounds (COVs) in paints and paste coatings.

NF Certification

Most of the Gypsotech® boards have obtained NF certification, a fundamental requisite for the French market. NF certification is issued by CSTB Paris, in accordance with NF certification regulation 081 specified by AFNOR, the French standards organisation. Certification is only issued following audits and sampling by CSTB, which then tests the specimens in its laboratories.

French Label - Étiquetage sanitaire

A classification and labelling system applied to emissions of volatile organic compounds from construction and decoration products and indoor paints. In January 2012 labelling of all products introduced onto the French market for the first time became obligatory and since September 2013 it has been obligatory for all products sold on French territory. All Fassa products boast the A+ class label.

Three missions: Diagnosis, Technology and Aesthetics

The choice of the best solution for carrying out building recovery work always starts with correct **DIAGNOSIS**.

This activity is fundamental in ensuring final quality; managed by Fassa Bortolo specialists, their extensive experience makes this stage the first element of excellence in the service offered.

Diagnosis is essential in defining which type of cycle is the most suitable for meeting the requirements of the work and identifying the products and processes that, based on profound knowledge of site technical issues, can guarantee the expected optimum result.

Recovery or remediation always involves an objective of improving functional, energy and aesthetic performance through application of the Facade System cycles, and the performance of product and process **TECHNOLOGY**, whose absolute quality guarantees that the value of the investment will be protected over time.

For many years Fassa Bortolo has been investing in continuous research and development of its solutions, based on climatic changes and the effects of time on structures, pursuing the principle of qualitative excellence that has always been the company's hallmark.

AESTHETICS are the result of work performed to the best industry standards, another way of saying guaranteed to be done right, in the best Fassa Bortolo tradition.

BIO SYSTEM PLASTER

KB 13

Lime-based base plaster for interiors and exteriors, with 'marmorino' effect

USE

- Base plaster for brick walls
- Base plaster for concrete blocks, concrete casts

BENEFITS & FEATURES

- Excellent adhesion on stone, masonry and concrete surfaces
- Natural lime and marble dust base, with 'marmorino' effect
- Applicable by hand or with machine
- First bio-plaster with ANAB certificate in Italy

CODE	417
PACK	30 kg
QTY. PER PALLET	48

CONSUMPTION	approx. 13 kg/m ² for 10 mm thickness
STORAGE	12 months in a dry place
APPLICATION TEMPERATURE	+5°C / +30°C

K 1710

Traditional fibre-reinforced bio-plaster with a pure nano-lime base and pozzolanic action, for interiors and exteriors

USE

- Bio-architecture and bio-construction interventions
- Base plaster for brick walls
- Base plaster for concrete blocks, concrete casts
- Restoration of old rock, stone, brick and tuff surfaces
- Mechanically weak surfaces

BENEFITS & FEATURES

- Excellent adhesion on stone, brick, tuff surfaces, etc.
- New nano-lime technology (EN 459) with nanometric particles
- Fibre-reinforced, with pozzolanic action
- Excellent breathability and absence of surface cracks
- Applicable by hand or with machine

CODE	476T
PACK	30 kg
QTY. PER PALLET	48

CONSUMPTION	approx. 13.5 kg/m ² for 10 mm thickness
STORAGE	12 months in a dry place
APPLICATION TEMPERATURE	+5°C / +30°C

BIO SYSTEM **DEHUMIDIFICATION**

S 650 BIO DEHUMIDIFYING UNDERCOAT

Mortar made from PURE HYDRATED LIME, sulphate-resistant, for rebuilding and undercoating brick and stone walls and repairing plaster finishes with dampness problems

USE

- Specifically for bio-architecture
- Renovation of damp masonry
- Mortar for bedding/laying bricks and rebuilding brick walls
- Undercoat for renovating damp masonry

BENEFITS & FEATURES

- Dehumidifying
- Sulphate-resistant
- Non-toxic material

CODE	458T
PACK	30 kg
QTY. PER PALLET	48

CONSUMPTION	approx. 3-5 kg/m ²
STORAGE	12 months in a dry place
APPLICATION TEMPERATURE	+5 °C / + 30 °C

S 639 BIO DEHUMIDIFYING PLASTER

Mortar made from PURE HYDRATED LIME, sulphate-resistant, for creating dehumidifying plaster on brick, stone and tuff walls with dampness problems

USE

- Specifically for bio-architecture
- Plaster for damp masonry
- Renovating plaster (R)

BENEFITS & FEATURES

- Dehumidifying
- Sulphate-resistant

CODE	453T
PACK	30 kg
QTY. PER PALLET	48

CONSUMPTION	approx. 11.5 kg/m ² for 10 mm thickness
STORAGE	12 months in a dry place
APPLICATION TEMPERATURE	+5°C / +30°C

BIO SYSTEM **DEHUMIDIFICATION**

RISANAFACILE “**EASY & DRY**”

Lightweight undercoat and porous plaster, made from very fine pure lime, fibre-reinforced, with pozzolanic effect, for renovation of brick and stone walls and repairing plaster finishes with dampness problems

USE

- Undercoat and plaster for renovation of damp masonry
- Undercoat and plaster for salt-laden masonry
- Renovation of masonry subject to decay
- Specifically for bio-architecture and sustainable building

BENEFITS & FEATURES

- Dehumidifying and very high breathability
- Undercoat and plaster together in one product
- Sulphate-resistant
- Meets LEED requirements (MR2, MR5, IEQ 4.2, ID 1)
- Lightweight, white, fibre-reinforced

CODE	480
PACK	25 kg
QTY. PER PALLET	48

CONSUMPTION	approx. 10 kg/m ² for 10 mm thickness
STORAGE	12 months in a dry place
APPLICATION TEMPERATURE	+5°C / +30°C

TECHNICAL CHARACTERISTICS

WATER VAPOUR DIFFUSION RESISTANCE FACTOR	$\mu \leq 11$ (measured value)
WATER ABSORPTION COEFFICIENT DUE TO CAPILLARY ACTION	$c \geq 0.3$ kg/m ² after 24 h
WATER PENETRATION FOLLOWING THE CAPILLARY ABSORPTION TEST	≤ 5 mm
POROSITY ON HARDENED PLASTER (MERCURY POROSIMETRY)	$> 40\%$
THERMAL CONDUCTIVITY COEFFICIENT	$\lambda = 0.35$ W/m·K (tabulated value)
EN 998-1 compliance (R –CSII)	

BIO SYSTEM **FINISHING**

S 605 BIO DEHUMIDIFYING FINISH

Finishing mortar made from PURE HYDRATED LIME, for finishing porous renovation plasters on brick, stone and tuff walls with dampness problems

USE

- Specifically for bio-architecture
- Plaster finish for damp masonry
- Renovation plaster finish (R)
- Bedding mortar finish

BENEFITS & FEATURES

- Very high breathability
- Sulphate-resistant

CODE	457T	CONSUMPTION	approx. 1.4 kg/m ² for 10 mm thickness
PACK	25 kg	STORAGE	12 months in a dry place
QTY. PER PALLET	48	APPLICATION TEMPERATURE	+5°C / +30°C

BIO SYSTEM **DECORATION**

PS 403

PS 403 is a finish for exteriors. It is suitable for application on any type of plaster, especially ones with dehumidifying properties

USE

- Suited for decoration and renovation system
- Long last protection

BENEFITS & FEATURES

- Very high breathability
- High water-repellent effect
- Improved resistance to mould and algae

PACK	14 l
QTY. PER PALLET	33

CONSUMPTION	4-5 m ² /l approx. (2 coats)
STORAGE	12 months
APPLICATION TEMPERATURE	+5°C / +30°C
SPECIFIC WEIGHT	1.58 kg/l

FASSIL P 313

FASSIL P 313 is a potassium silicate water-based paint. It has a mineral aspect and complies with standard DIN 18363. The nature of the raw materials being used maintains the breathability of the masonry

USE

- Suited for historic and artistic buildings
- For protective and decorative paint
- For interior and exterior finish

BENEFITS & FEATURES

- High breathability
- Mineral product
- Smooth effect with hiding power

PACK	5 - 14 l
QTY. PER PALLET	33

CONSUMPTION	3.5-4.5 m ² /l approx. (2 coats)
STORAGE	12 months
APPLICATION TEMPERATURE	+5 °C / + 30 °C
SPECIFIC WEIGHT	1.47 kg/l

CLASSIC SYSTEM **PLASTER**

KZ 35

Plaster with lime and cement base, with water-repellent properties, formulated for skirting applications in interiors and exteriors

USE

- Skirting plaster for walls made of hollow bricks, full bricks and blocks
- Skirting plaster for mixed walls
- Skirting plaster effective against sulphates in the ground and on the wall
- Formulated as a base for outdoor surfaces, for mineral-based wall linings

BENEFITS & FEATURES

- Excellent adhesion on stone, masonry and concrete surfaces
- Excellent resistance to sulphates
- Water-repellent
- Applicable by hand or with machine

CONSUMPTION	approx. 11.5 kg/m ² for 10 mm thickness
STORAGE	12 months in a dry place
APPLICATION TEMPERATURE	+5°C / +30°C

CLASSIC SYSTEM **FINISHING**

IP 10

Hydrated lime, cement and graded sands finish coat plaster for exteriors and interiors

USE

- Finishing plaster on lime and cement-based foundation plaster

BENEFITS & FEATURES

- Water-repellent, with lime and cement base
- Different graded sands
- Reduces the appearance of hairline cracks

CODE	673
PACK	30 kg
QTY. PER PALLET	48

CONSUMPTION	1 mm = approx. 2 kg/m ²
STORAGE	12 months in a dry place
APPLICATION TEMPERATURE	+5°C / +30°C

LC 7

White cement-based skim coat

USE

- Skim coating of concrete surfaces
- Skim coating of base plaster for brick walls
- Skim coating of plastered stone, full-brick and hollow-brick surfaces in interiors and exteriors

BENEFITS & FEATURES

- Excellent adhesion on concrete and masonry surfaces
- Easy to work, can be finished with a float and sponge
- Select aggregates guaranteeing excellent surface finish

CODE	433
PACK	30 kg
QTY. PER PALLET	48

CONSUMPTION	approx. 0.5 - 1 kg/m ² depending on the surface to be treated
STORAGE	12 months in a dry place
APPLICATION TEMPERATURE	+5°C / +30°C

CLASSIC SYSTEM **FINISHING**

S 605 BIO DEHUMIDIFYING FINISH

Finishing mortar made from PURE HYDRATED LIME, for porous renovation plaster finishes on brick, stone and tuff walls with dampness problems

USE

- Specifically for bio-architecture
- Plaster finish for damp masonry
- Renovation plaster finish (R)
- Bedding mortar finish

BENEFITS & FEATURES

- Very high breathability
- Sulphate-resistant

CODE	457T
PACK	25 kg
QTY. PER PALLET	48

CONSUMPTION	approx. 1.4 kg/m ² per mm in thickness
STORAGE	12 months in a dry place
APPLICATION TEMPERATURE	+5°C / +30°C

CLASSIC SYSTEM **DECORATION**

FX 526

FX 526 is a pigmented primer undercoat filler

USE

- For thick layer finish coatings
- Specifically for FASSATHERM EWI System
- Over painted masonry walls

BENEFITS & FEATURES

- White or pigmented filling undercoat
- Protective efficacy and product versatility
- Hiding power and uniform surface

PACK	5 - 14 l
QTY. PER PALLET	33

CONSUMPTION	6-8 m ² /l approx.
STORAGE	12 months
APPLICATION TEMPERATURE	+5 °C / + 30 °C
SPECIFIC WEIGHT	1.61 kg/l

CLASSIC SYSTEM **DECORATION**

PX 505

PX 505 is a finish, white or coloured, water-based paint for exteriors

USE

- Long last protection
- For protective and decorative paint
- For new and old finish coat plaster

BENEFITS & FEATURES

- Good breathability
- Excellent water-repellency
- Improved resistance to mould and algae
- Excellent protection

PACK	14 l
QTY. PER PALLET	33

CONSUMPTION	4-5 m ² /l approx. (2 coats)
STORAGE	12 months
APPLICATION TEMPERATURE	+5°C / +30°C
SPECIFIC WEIGHT	1.57 kg/l

RX 561

RX 561 is a finish coat plaster in paste. The nature of the raw materials being used provides a finish with a rustic effect. Compliant with standard EN 15824

USE

- For exteriors on lime/cement base coat plasters
- Specifically for FASSATHERM EWI System

BENEFITS & FEATURES

- Excellent water-repellency
- Good breathability
- Improved resistance to mould and algae
- Excellent protection
- Available in the winter version

PACK	25 kg
QTY. PER PALLET	33

CONSUMPTION	1 mm: 2-2.5 kg/m ² - 1.5 mm: 2.3-2.7 kg/m ² 2 mm: 2.6-3.4 kg/m ²
STORAGE	12 months
APPLICATION TEMPERATURE	+5 °C / + 30 °C
SPECIFIC WEIGHT	1.85 kg/l

CLASSIC SYSTEM **DECORATION**

PS 403

PS 403 is a finish for exteriors. It is suitable for application on any type of plaster, especially ones with dehumidifying properties

USE

- Suited for decoration and renovation system
- Long last protection

BENEFITS & FEATURES

- Very high breathability
- High water-repellent effect
- Improved resistance to mould and algae

PACK	14 l
QTY. PER PALLET	33

CONSUMPTION	4-5 m ² /l approx. (2 coats)
STORAGE	12 months
APPLICATION TEMPERATURE	+5°C / +30°C
SPECIFIC WEIGHT	1.58 kg/l

FASSIL P 313

FASSIL P 313 is a potassium silicate water-based paint. It has a mineral aspect and complies with standard DIN 18363. The nature of the raw materials being used maintains the breathability of the masonry

USE

- Suited for historic and artistic buildings
- For protective and decorative paint
- For interior and exterior finish

BENEFITS & FEATURES

- High breathability
- Mineral product
- Smooth effect with hiding power

PACK	5 - 14 l
QTY. PER PALLET	33

CONSUMPTION	3.5-4.5 m ² /l approx. (2 coats)
STORAGE	12 months
APPLICATION TEMPERATURE	+5 °C / + 30 °C
SPECIFIC WEIGHT	1.47 kg/l
