**FASSA  
BORTOLO**  
QUALITY FOR BUILDING

## TYPE OF WORK

Application of waterproof coating

Laying of mosaic tiles

Epoxy grouting of mosaic tiles

In the heart of Riccione, just 50 metres from the sea, lies Hotel Royal Riccione, a splendid structure that has been completely renovated both on the inside and outside. An intimate haven of relaxation that in addition to the usual services, also offers its guests numerous attractions, such as the new outdoor **wellness pool** (equipped with whirlpools, geysers, massage waterfall, loungers and lumbar massage jets).

There are also two 8-seater whirlpools with chromotherapy: one on the **relaxation deck**, which also features hammocks and sofas, another in the **green solarium** with loungers and a sea view. Perfect for those seeking total relaxation and tranquillity.

**FASSA BORTOLO** products were used for the construction of the wellness pool.

The waterproof coating was bonded using **AZ 59 FLEX**, a professional one-component adhesive with good elasticity, available in white and grey, specifically for interior and exterior floors and walls. The refined mosaic tiles were then laid on the entire surface of the pool, using **ADYS** extra-white, non-slip adhesive with extended open time, with the addition of **DE 80 LATEX**, elasticising latex with high binding capacity. The mixture of these two products gave an adhesive with strong elastic and waterproofing properties, fundamental requirements for laying mosaic tiles in pools.

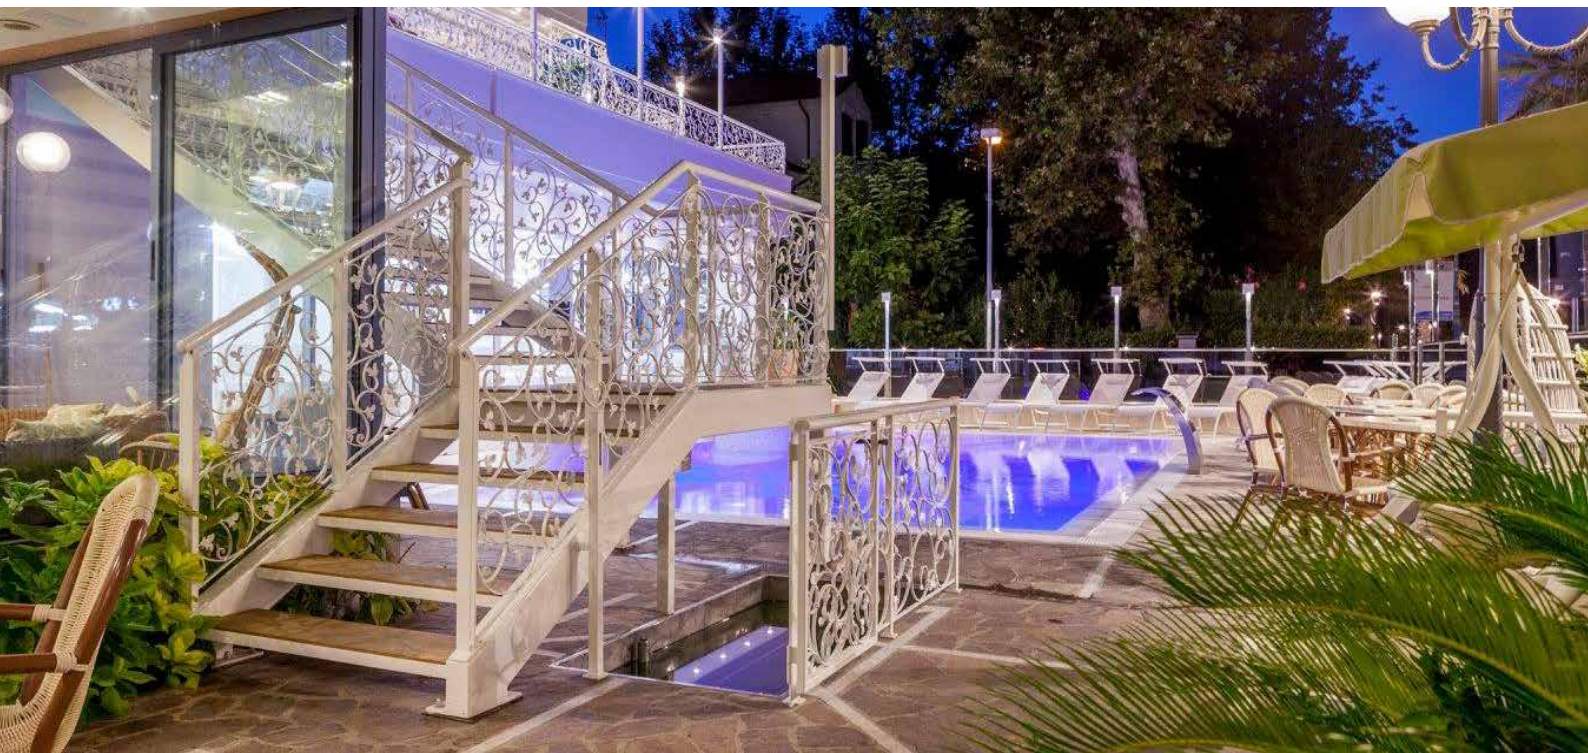

To complete the application cycle, the mosaic tiles were grouted using **BLUCOLORS**, a two-component acid-resistant epoxy sealant with high aesthetic value. This product is particularly suitable for creating acid-resistant coverings where a high level of hygiene, mechanical strength and resistance to chemical aggression is required. For interiors and exteriors, for joints from 2 to 20 mm.

On the bottom of the pool, covered with beautiful pearly white mosaic tiles, the name of the hotel was written using **precious pure gold inserts**, whose glow attracts the attention not only of bathers but also passers-by walking along the adjacent central avenue.

*Swimming pool, whirlpools and  
green solarium*

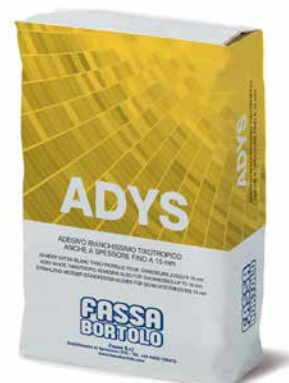

PRODUCTS USED

**AZ 59 FLEX**

White and grey one-component super adhesive with good elasticity for interior and exterior floors and coverings

**ADYS**

Extra-white and grey non-slip adhesive for floors and wall coverings, interiors and exteriors, with extended open time and for thicknesses up to 15 mm

**DE 80 LATEX**

Superelastic latex additive for cementitious adhesives, for interiors and exteriors

**BLUCOLORS**

Two-component acid resistant coloured epoxy adhesive and sealant for joints from 2 to 20 mm
