FASSA BORTOLO BRING MODERN AESTHETIC TO OLD HOME.

The applicators at Wirral Plastering & Building Contractors were asked to render the existing façade of the family home, using a white render to give the property a crisp, modern finish – an incredibly sought after looking at the moment. At around 150 square meters in size, the applicators brought Fassa Bortolo in to

specify the right solution and fit the client's needs.

A series of Fassa products were specified to complete the job. After the homeowner was satisfied with the sample panel, the applicators used Fassa **FASSACOUCHE** in Bianchissimo colour.

The through colour, bright white finish of the render was exactly what the homeowner had in mind to make their home stand out. This system was combined with the **S 650** Puracalce undercoat.

Craig Dalladay, Fassa ASM for the north east comments: "We've worked with the team at Wirral Plastering & Building Contractors in the past, so I was delighted when they came to us once again for help with specifying a new project. In the end we were very impressed with the outcome, as was the contractor and the homeowner as the finished look is clean, contemporary and full of life, exactly as desired."

Ian Jones of Wirral Plastering and Building Contractors adds: "I was taken back by the service from the Fassa team from start to finish, and just as impressed by the quality and performance of the product. Each stage was simple to apply and there was no hassle, so I'll definitely be looking to get Fassa onboard with any future projects."

FASSA BORTOLO PRODUCTS

S 650
